1. Objective of the report

Project website is one of the main and most important communication and dissemination tools which give the opportunity to reach wider audience.

HISER webpage has been developed by ASM as Deliverable 8.2, in collaboration with Project Coordinator and all Partners. Project website is available under the following domain: www.hiserproject.eu.

This document gives a short overview of the project website, its structure and functionalities.

2. HISER website

HISER website has been designed with the aim to inform the public about the project concept, objectives, latest developments and the project progress.

HISER website design has been based on the project logo. The colours and the style of the webpage are coherent with all the dissemination materials. The webpage is a kind of a business card of the project therefore project identity rules have been respected.

HISER website is RSS feed. RSS feeds enable publishers to syndicate data automatically. A standard XML file format ensures compatibility with many different machines/programs. RSS feeds also benefit users who want to receive timely updates from favourite websites or to aggregate data from many sites. Subscribing to a website RSS removes the need for the user to manually check the website for new content. Instead, their browser constantly monitors the site and informs the user of any updates.

On the HISER home page, which is the first place the users see, the sections related to the latest information on the progress of the project, announcements of events, etc. are placed.

More information about the objectives of the project and the planned tasks are located on particular subpages. The construction of each subpage has been created to inform users in the first place about the general objectives and activities. More detailed information is available after clicking on interesting topics. In this way, various subpages are not overloaded with information, so it is more readable for users. At the same time it gives an opportunity to interested users to deepen their knowledge by moving to deeper website content.

Project website will be updated each 3 months or when necessary. Information and news to be updated on the website will be delivered by partners to ASM who is managing the webpage.

2.1. Home page

Figure 1 HISER home page

The concept of the home page has been developed in order to avoid overwhelming the user with too much information. It presents project logo and project title, along with short information about the project objectives. On top there is also the main menu that directs the user to certain areas (subpages). The three shifting sliders which redirect the user to particular subpages attract the main focus. The slider are the following:

- Why we need novel recycling and recovery solutions?* (redirection to subpage „Our goals”)
- Techniques to recover valuable raw materials* (redirection to subpage „Our activities”)
- Sentence: Meet our partners* (redirection to subpage „Partners”)

The home page also includes a section related to latest news and coming events (for example workshops, conferences in which project partners will take part, etc.). Since HISER project and its results will be disseminated with the use of social media a LinkedIn script allows to join the project group.

Recipients interested in the project results have the ability to sign up for the project newsletter.

Information on the EU funding is visible on all subpages.

2.2. Subpages

Each subpage has the same sections (on top main menu + HISER logo + motto) and on the left side links to news section, events section, „newsletter button” and social media script.

2.2.1. Subpage: Goals

Subpage „Goals” includes general introduction of the goals that are planned to be achieved in the framework of the project, with the following sections: novel harmonized methodological solutions and tool, advanced technologies for the production of high-purity raw materials, new building products through the (partial) replacement of virgin raw materials.

Figure 2 Subpage: Goals

On each of the sections mentioned above, user can click the button „Click to learn more” and will be redirected to the subpage dedicated to it.

Figure 3 Subpage: Goals

2.2.2. Subpage: Activities

Subpage „Activities” presents the areas on which HISER project focuses. Presented is a graph that includes active „buttons” that redirect to deeper subpages where user will find more information about the proposed solution:

- Smart demolitions and refurbishments
- Automated sorting and recycling
- Automated quality assessment system
- New building products
- Case studies
- Integrated Environmental and Economic Assessment from Life Cycle Perspective
- Policies and Standards Recommendations

Figure 4 Subpage "Activities"

2.2.3. Subpage: Library

Subpage „Library“ contains all dissemination materials (e-brochures, videos, etc.), presentations (from different meetings, conferences, workshops), reports and articles that are available for public view. All publications, reports, multimedia that project Partners will be willing to present will be available in this section.

2.2.4. Subpage: Partners

This subpage presents all HISER Partners. The information regarding each partner includes: full name of institution, link to the website and main researchers (pictures and contact details). This information will allow interested recipients to contact particular Partners e.g. to exchange knowledge, ask questions concerning the project, invite to events etc.

Figure 5 Subpage "Partners"

2.2.5. Subpage: Contact

Electronic form to contact to the coordinator is available in the "Contact" subpage.

2.3. Intranet

The website has an intranet which is available only for the project partners. This is the space where Partners may upload and download all necessary project documents, materials, publications, etc. Each project Partner received login and a password to the intranet and may use it whenever needed. The categories of materials that will be available on the intranet are the following:

- Meetings (AG, MIN, practical info about meetings)
- Official documents:
- Presentations from meetings and events
- Contact details of the Consortium
- Internal project calendar
- Photo archive
- Graphics and pictures of interest
- Useful information, link, announcements, news

The screenshot displays the Hiser intranet interface. At the top, a navigation bar includes links for HOME, DOWNLOAD, GOALS, ACTIVITIES, LIBRARY, PARTNERS, CONTACT, and NEWS. A breadcrumb trail indicates the user's location: Home / Download / List all categories. The left sidebar contains a LOGIN section with a user profile for Agnieszka Kowalska and a Log out button. Below this is the COMING EVENTS section, featuring a workshop on integrated environmental and economic assessment held in Brussels on June 18, 2015. The LATEST NEWS section reports on a collaboration between HISER, IRCOW, and C2CA, dated May 31, 2015. A NEWSLETTER subscription form is also present, with a Subscribe button. The main content area shows an Overview of the library with a pagination control (Page 1 of 2) and a list of categories: Meetings, Official documents, Presentations from meetings and events, Contact details of the Consortium, and Internal project calendar. Each category is accompanied by a small icon and a 'Files: 0' status. A 'Back' link is located at the bottom left of the main content area, and a 'Powered by jDownloads' notice is at the bottom right.
